## SCORES BY MAJOR DATA CATEGORY

## SUMMARY

China ranks 60 in the Open Data Inventory 2016 with an overall score of 44%. The overall score is a combination of a data coverage subscore of 42% and a data openness subscore of 46%.

China scores lower than the regional median across all three major data categories. Within the country, the highest levels of coverage and openness are on economic statistics and the lowest levels are on social statistics.

## RECOMMENDATIONS

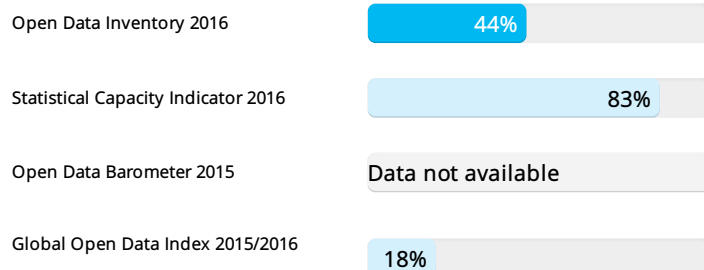

### Coverage Coverage

- Collect and publish more recent data in social and environmental statistics.
- Collect and publish more historical data in social and environmental statistics.

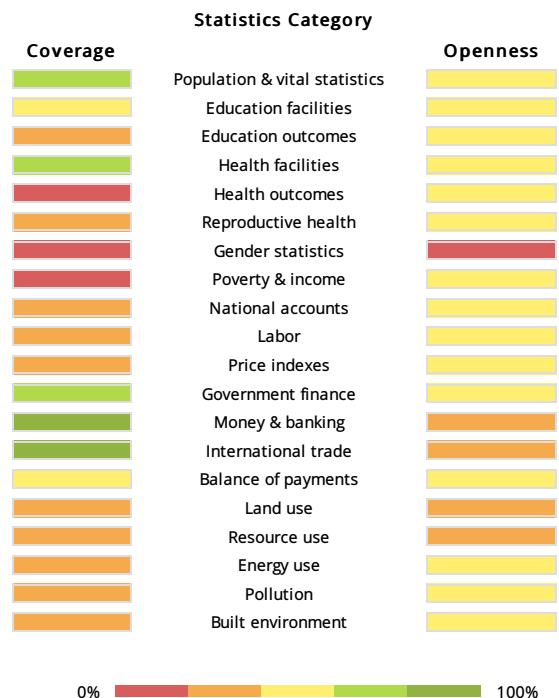

### Openness

- Create a clear and open terms of use policy, such as CC BY 4.0, for all websites publishing official statistics.
- Publish more data in machine-readable formats such as XLSX, CSV, or JSON.
