SUMMARY

Czech Republic ranks 2 in the Open Data Inventory 2016 with an overall score of 82%. The overall score is a combination of a data coverage subscore of 79% and a data openness subscore of 84%.

Czech Republic scores higher than the regional median across all three major data categories. Within the country, the highest levels of coverage and openness are on economic statistics and the lowest levels are on social statistics.

RECOMMENDATIONS

Coverage

- Collect and publish more data disaggregated at the first and second administrative level across all data categories.
- Collect and publish data more disaggregated data on education/health outcomes and reproductive health.

Openness

- Make available download options for all data to allow users to customize data exports.
