Global	38%	48%	33%

SUMMARY

Israel ranks 100 in the Open Data Inventory 2016 with an overall score of 37%. The overall score is a combination of a data coverage subscore of 26% and a data openness subscore of 46%.

Israel scores higher than the regional median for economic statistics. Within the country, the highest levels of coverage and openness are on economic statistics and the lowest levels are on environmental statistics.

RECOMMENDATIONS

Coverage

- Collect and publish more disaggregated data across all data categories.
- Collect and publish more recent data across all data categories.

Openness

- Create a clear and open terms of use policy, such as CC BY 4.0, for all websites publishing official statistics.
- Publish more environmental data in machine-readable and nonproprietary formats such as XLSX, CSV, or JSON.
