Global	39%	56%	40%

SUMMARY

Poland ranks 4 in the Open Data Inventory 2018 with an overall score of 82%. The overall score is a combination of a data coverage subscore of 79% and a data openness subscore of 85%.

Poland scores higher than the regional median across all three major data categories. Within the country, the highest levels of coverage and openness are on economic statistics and the lowest levels are on social statistics.

RECOMMENDATIONS

Coverage

- Collect and publish more data disaggregated at the first administrative level in social and environmental statistics.
- Collect and publish more data disaggregated at the second administrative level across all data categories.

Openness

- Publish more environmental metadata to accompany data to increase its usefulness.
- Make available download options for social data to allow users to customize data exports.
