## SUMMARY

United States ranks 13 in the Open Data Inventory 2018 with an overall score of 74%. The overall score is a combination of a data coverage subscore of 64% and a data openness subscore of 82%.

United States scores lower than the regional median across all three major data categories. Within the country, the highest levels of coverage and openness are on economic statistics and the lowest levels are on social statistics.

## RECOMMENDATIONS

## Coverage

- Collect and publish more recent data in environmental statistics.
- Collect and publish more historical data in environmental statistics.

## Openness

- Make available download options for social and environmental data to allow users to customize data exports.
