St. Lucia ranks 82nd in the Open Data Inventory with a total score of 24/100. The total score is a combination of a data coverage sub-score of 38/100 and a data openness sub-score of 11/100.

St. Lucia scores the same as the regional median across all three major data categories. Within the country, the highest levels of coverage and openness are on economic statistics and the lowest levels are on environmental statistics.

Looking across all 20 data categories, St. Lucia provides the best coverage on: Balance of Payments and Money & Banking, and the least coverage on, but not limited to: Health Outcomes and Gender Statistics.

In terms of openness, St. Lucia receives the highest scores on, but not limited to: Labor Statistics and Built Environment, and the lowest scores on, but not limited to: Gender Statistics and Poverty & Income Statistics.

Updates: In June 2014, Saint Lucia was the first country in the region to join the World Bank open data initiative. In August 2015, the Department for Effective Management within the Organization of American States (OAS) announced they will perform an assessment of Saint Lucia’s open government initiative.
