SUMMARY

Philippines ranks 40 in the Open Data Inventory 2018 with an overall score of 58%. The overall score is a combination of a data coverage subscore of 50% and a data openness subscore of 65%.

Philippines scores higher than the regional median across all three major data categories. Within the country, the highest levels of coverage and openness are on economic statistics and the lowest levels are on social statistics.

RECOMMENDATIONS

Coverage

- Collect and publish more recent data in social and environmental statistics.
- Collect and publish more historical data in social and environmental statistics.

Openness

- Create a clear and open terms of use policy, such as CC BY 4.0, for all websites publishing official statistics.
- Publish more metadata to accompany data to increase its usefulness.
