SUMMARY

United States ranks 9 in the Open Data Inventory 2016 with an overall score of 76%. The overall score is a combination of a data coverage subscore of 77% and a data openness subscore of 75%.

United States scores higher than the regional median for social and environmental statistics. Within the country, the highest levels of coverage and openness are on environmental statistics and the lowest levels are on economic statistics.

RECOMMENDATIONS

Coverage

- Collect and publish more data disaggregated at the first administrative level in social and economic statistics.
- Collect and publish more data disaggregated at the second administrative level across all data categories.

Openness

- Create a clear and open terms of use policy, such as CC BY 4.0, for all websites publishing official statistics.
